

# Key joints for therapeutic treatment with red and infrared light therapy

**STEP 1:** Identify the area that requires treatment

**STEP 2:** Press the 'R' button and place the device on the area requiring treatment. Hold for 30 - 60 seconds (depending on the reaction time of the dog). For larger areas, move the device around until the whole area has been treated for between 30 and 60 seconds.

**STEP 3:** Repeat daily (or every other day) as part of a lasting routine. The benefits of red light therapy last 24-48 hours.
